## WILSON MAY CLOSE MINES

President Discusses Colorado Situation with Atty.-Gen. Gregory

## IS OPPOSED BY GOVERNOR AMMONS

State in Position to Care for Itself—Shouldn't Listen to Mother Jones

Washington, Oct. 30.—President Wilson is seriously considering whether he has authority to close the Colorado coal mines involved in the strike, if the operators continue to refuse the plan of settlement already accepted by the miners. Attorney General Gregory conferred with the president yesterday and it was understood Mr. Wilson had asked him for a legal opinion on his right to close the mines, if public necessity, in his opinion, required that step. After seeing the president Mr. Gregory refused to discuss the question.

The president has received suggestions that he close the mines. Some of his advisors have gone further and suggested that the government operate them. He is unwilling to keep federal troops in the state just at a time when the greatest demand for fuel is beginning.

AMMONS OPPOSES CLOSING.

Governor Says State Can Handle Trouble Itself.

Denver, Col., Oct. 30.—"I see no occasion for closing the Colorado coal mines and imposing an industrial burden on the state just at a time when the greatest demand for fuel is beginning," was the statement of Governor E. M. Ammons yesterday when told of a Washington dispatch indicating that President Wilson was considering whether he has authority to shut down the properties owned by operators who have refused to accept the Davis-Fairley plan of settling the miners' strike.

"I have understood the president would withdraw the federal troops about Nov. 15. In my judgment he can safely do so and the state will be prepared at that time to assume responsibility for keeping order in the strike district." Referring to the visit of "Mother

## Borax In The Family Wash

Most everyone knows that borax gives greater cleansing power to soap. Soap without borax is like bread without yeast!

There must be one part borax to three parts soap. This is only possible in borax soap chips. Not possible in bar soap.

"20 Mule Team Borax Soap Chips" at 20c will do more cleaning than 50c worth of bar soap or washing powder.

## "I WAS A NERVOUS WRECK"

When I Began Taking Vinol"—Mrs. Clayton's Letter Should Interest Every Weak, Nervous, Rundown Woman

Louisville, Ky.—"I was simply a nervous wreck, and in a weak, run-down condition when a friend asked me to try Vinol. I did so, and received so much benefit from the first bottle I decided to keep on taking it, and as a result I have gained in health and strength right along. I think Vinol is the best medicine in the world for a nervous, weak, run-down system and for elderly people, and I cannot praise it too highly for what it has done for me."—Mrs. W. C. Clayton, Louisville, Ky.

There are hundreds of men and women in this vicinity who are on the borderland of nervous prostration, overworked, rundown and nervous. We ask every such person to call at our store for a bottle of Vinol, our delicious cod liver and iron tonic without oil. Vinol is not a patent secret nostrum, but an honest, tried and true body builder and strength creator of world-wide fame, delicious and easy to take.

Floyd G. Russell, druggist, Barre, Vt. NOTE.—You can get Vinol at the leading drug store in every town where this paper circulates.—Adv.

Mary Jones and James Lord of the mining department of the American Federation of Labor to the president Governor Ammons said:

"I cannot believe that Mr. Wilson will pay any attention to the representations made by such persons, who are not residents of Colorado and are not qualified to speak for the people of the state. If the president seeks advice regarding the coal strike he can obtain plenty of it from Colorado people, who understand the situation and can give him an unbiased opinion."

## ONLY IN COTTON SPINNING.

Is British Industry Suffering, Says Associated Press Dispatch.

London, October 30.—Only in cotton spinning is British industry suffering. In addition to supplying the expeditionary force and the new army with clothing and equipment, Russia has placed orders for a million pairs of boots and the British woolen mills and shoe factories have other contracts they are as yet unable to place, which could be easily taken by American manufacturing agents, were they in the field.

The greatest wastage in the war has been in the motor vehicle line. Not only are the cars racked to pieces by hard service, but large numbers are destroyed by shell. British manufacturers have not the equipment to supply this wastage.

Russia is not a manufacturing country, and the factories of France have been largely destroyed in the north and in other parts are shut down because of the lack of hands.

## STEEL FLAWS FOUND BY NEW METHOD

Naval Academy Experiments May Overturn Specification Conditions and Prevent Taking Bad Rails.

Washington, Oct. 30.—Remarkable success has attended the experiments which have for a long time been in progress at the naval academy, the object of which was to detect concealed flaws in

masses of steel and other metals used in ship construction and engines. By photomicrographic observations it is believed that it will be possible with certainty to detect any dangerous flaws and internal cracks in the great steel shafts and other parts of the engines upon which the safety and mobility of the ship depend. If these experiments work out as expected they will result in revolutionizing the methods of specifications to be included in all contracts for naval structural steel, and even more impor-

tant, they may present a certain means of preventing acceptance of the defective steel rails which have caused disastrous railroad wrecks.
